College Landing Page Website – GitHub Repository Report

Project Overview
This project is a responsive college landing page created using HTML5 and CSS3. It represents the homepage of G.H Raisoni College of Engineering and Management, Jalgaon, showcasing courses, admissions, and contact information in a clean and modern layout.

Features
• Professional header with navigation menu
• Hero section with call-to-action buttons
• About college section
• Courses section with hover effects
• Admissions section with registration button
• Contact information section
• Footer with copyright details

Technologies Used
• HTML5
• CSS3

Project Structure
index3.html – Main HTML file
style3.css – CSS styling file
README.md – GitHub repository documentation

Learning Outcomes
• Building structured web pages using HTML
• Styling layouts with CSS and Flexbox
• Creating responsive and user-friendly designs
• Understanding real-world landing page layouts
